

What is SLA ?

SLA is short for Service Level Agreement. These are the contractual agreements which take place between two parties – the client and the service provider. Within these agreements we Genhost Webhosting Solution and Clients have made an Online Agreements about the Server/Network Uptime to ensure our trust and Quality of services offered.

We are ensured to deliver all the requirements mentioned in the SLA. This way, the client can ensure having the service they expected and signed up for.

Our Service Level Agreement (SLA) :

Only the Following Plans offered by Genhost Webhosting Solution are covered under the SLA

- Shared Hosting (HDD & SSD)
- Reseller Hosting (HDD & SSD)
- Master Reseller Hosting (HDD & SSD)
- Alpha Reseller Hosting (HDD & SSD)
- Startup Reseller Hosting
- KVM Unmanaged VPS
- Managed VPS Servers

WE DON'T OFFER ANY TYPE OF COMPENSATION FOR DEDICATED SERVERS !

Above Mentioned Shared/Reseller Hosting Services the monthly Availability will be 99% Only. You could see the Server Status from UptimeRobot Public Status Link : <https://stats.uptimerobot.com/2vK3WHZ64>

We will be also Having an internal Monitoring system from our Datacenter end, So in case of any compensation request raised we will check both Logs for Confirmation.

If the service/Network is down for Morethan 3 hours You will be getting the Compensation of Maximum 10 Days Date Extension for your Active Service (Which is affected)

We don't offer compensation in Type of Cash/Money ! We offer Compensation as Date Extension on the Affected Service ! The maximum Compensation will be 10 day ONLY !

Compensation Will not be Offered for Following :

- IP Blocks by our Firewall due to Abuse cases Like Failed Logins/Attacks
- Account Suspension
- Abuse Cases
- Website Mis-configuration
- PHP/Development Related Errors
- Browser Cache issues
- DNS Propagations & Other DNS Errors & Issues
- Your Private Name server Issues
- Overdue Payments
- Service termination/suspension
- PHP Related Errors (404 Error , 500 Error)
- LVE Resource Exceeding (503 Error)

Compensation will be applied only if there is any issue only on Our Server/Network End !

As there are more Uptime monitor's available for use so we won't accept those reports if the client sent us their Website is Down.As some monitors gives false results due to their monitor IP blocked in our Firewall due to Heavy Connections to our Server.We will be very strict on Following the compensation we will verify the down from our Monitors (Data Center too)

Customers can open ticket to get their compensation Days Added to their Service Period
